Looking forward to an opportunity in an atmosphere where can make a difference with an ambitious pace and desire to scale the peaks of professional excellence.

Skills

Java | C# | C++	HTML | CSS | JavaScript	Leadership
Spring Boot	React | Native	Time Management
Node JS | Next JS	Android | IOS Development	Problem Solving
OOPS | DSA	PHP	Team collaboration
Machine Learning | Tensor Flow	SQL |Oracle	Multitasking
Docker | Postman	ASP.NET	Cloud Platforms |AWS
Scrum	Mongo Db | PostgreSQL	Git |Git Hub | CI/CD

Highlights Of Qualification

- Demonstrated expertise in OOP concepts, providing a solid foundation for software development.

- Proficient in database management, ensuring efficient data handling and storage in various applications.

- Proficient in fundamental data structures (binary trees, stacks, queues, linked lists, Hash table, Graphs) and experienced in various sorting and insertion algorithms, demonstrating a solid understanding of core concepts in data structures and algorithms.

- Experienced in Agile methodologies, particularly Scrum, facilitating efficient project management and collaboration within cross-functional teams.

Relevant Achievements

- Developed a flight booking system using C# for efficient management of bookings, showcasing practical application of programming skills.

- Designed and implemented a payroll management application with a user-friendly GUI using Java, highlighting practical experience in creating interactive software.

- Developed a Booking Management and Project Collaborator System with an excellent GUI using ASP.NET.

- Created multiple small games using Java, demonstrating creativity and problem-solving skills in software development.

- Achieved placement on the Dean's Honors List for two consecutive terms, reflecting strong academic performance and dedication to excellence.

- Collaborated in IEEE competitions, showcasing teamwork, communication, and problem-solving and ranked 14 in Canada. Contributed to interdisciplinary teams, integrating diverse perspectives for innovative project solutions.

- Developed a **Grocery Management System** using the **MPERN stack (Mongo Db, PostgreSQL, Express.js, React Native, Node.js)** to streamline grocery tracking and reduce waste. Integrated features like inventory management, shopping suggestions, and recipe recommendations, showcasing full-stack development and teamwork.

- Built a **Library Room Booking Service** and an **E-commerce Shopping Service** using **Spring Boot, MongoDB, PostgreSQL, Docker, OAuth 2, and Keycloak,** demonstrating proficiency in backend development, microservices, and secure authentication practices.

Education

George Brown College (GBC)   **September 2022 – April 2025**
Advanced Diploma in Computer Programming and Analysis
Duration - 3 Years

Certification

TOPS Technologies Training Certificate in Software Engineer (2022)

Work Experience

George Brown College (College, Toronto, ON)
Designation: Tutoring   **January 2024- April 2024**
- Helped my peers or juniors if they have any doubts in any of the subjects.
- Assisted them to download the IDE or Fulfill any other system requirements.
- Helped students to make their base strong and direct them in the right and professional way.
- Guided Students in any personal projects they are working on apart from our course's subjects.
- Used lectures, discussions, or supervised role-playing methods to present subject matter to students under direction and guidance of teachers.
- Helped students master assignment's concepts and reinforced learning concepts presented by teachers.
